Information and Communication Technology Industry

ICT Industry

Without Hungarians, IT might not even exist. John von Neumann is considered the father of modern computers. He invented the model known as the von Neumann architecture as part of the EDVAC experiment in 1952. His design contained elements such as the use of a binary signal, memory, an instruction system and program storage, which allowed him to create the first modern computer. Hungarian-born researcher John Kemény co-developed a simplified programming language known today as BASIC. He served as the President of Dartmouth College and he created the first time-sharing operating system. Andrew Grove, who was TIME magazine's 1997 Man of the Year, was also of Hungarian origin. As Intel's president, he boosted the speed of microprocessors. Charles Simonyi was a leading developer at Microsoft. He was initially in charge of developing Multiplan, the predecessor of Word and Excel. He also introduced the concept of object-oriented programming at Microsoft. The Information and Communication Technologies (ICT) sector is a crucial area in today's economy throughout Hungary. Its production value provides 5% of the country's GDP. More than 4% of active employees work in the digital economy field. The amount of goods and services provided by the sector accounts for 13% of Hungary's national exports. The continuous and dynamic, double-digit annual surge observed in the digital economy greatly exceeds the country's GDP growth rate.

55% of domestic ICT companies' sales revenue comes from export sales. Telecommunication devices, computers and peripherals make up one-third of ICT product exports. Although the external trade turnover of ICT services is

substantially lower than that of the trading of goods, it has become increasingly significant and holds a growing share of the foreign trade surplus. In 2017, the combined export turnover of ICT services (telecommunications, IT and database services, online publishing) grew by 12% in just one year.

Compared to other regions, the sector's overall contribution to the national GDP is the largest in Hungary. In addition, the proportion of companies manufacturing ICT devices is now also of prime value.

The Hungarian ICT sector has key competences in several areas, most importantly smart city and traffic, energy management, health services, agricultural, banking and enterprise software solutions, security printing and cybersecurity software solutions. The startup ecosystem has been becoming more robust in the country and the cooperation between companies and universities has also gained new momentum. Several programmes help young people to reach their full potential and companies are

START-UP ECO-SYSTEM RANKING OF CEE CITIES 2020

Source: StartupBlink

unable to discover promising candidates more efficiently than ever. The Startup Campus Hungary programme, powered by HEPA, supports the best ideas emerging from universities and helps students create marketable and internationally successful products and startups.

The domestic ICT sector also boasts several international success stories. Hungarian design software company Graphisoft's solutions have been used worldwide for several decades. The Budapest-based navigation software firm NNG started as a small startup and has become one of the leading vendors across the global automotive industry in 10 years. One of its most well-known solutions is navigation software 'iGO'. Its products are available in 190+ countries and 50 different languages. One of the

most notable success stories of the past few years is the Prezi web-based presentation software, used by 100+ million people globally. Talk-a-Bot, which also generates chatbot solutions, has been dynamically expanding to external markets propelled by an investment of several million euro.

13% of Hungarian exports are related to the ICT sector

BLACKBELT TECHNOLOGY LTD.

BlackBelt is a software innovation company based in Budapest, one of the European Union's fastest-growing tech capitals. The company utilises its low-coding platforms, replacing most traditional programming (e.g. hand-coding) activities performed by human developers using software robotics (automated programming) in a model where human developers only need to conduct critical tasks. BlackBelt is proud that its developers are seniors, earning the title 'master of technology' for experience in business-critical projects.

MORTOFF LTD.

Mortoff is an enabler for the full digital transformation of multinational companies, delivering results and values rather than products and services through in-house innovation. Its multi-technology, multi-industry approach guarantees the most tailor-made solutions for its customer needs. Mortoff is a team of approximately 170 people across 3 locations, with a solution-oriented mindset extending beyond traditional solutions.

The experience gained in past years and a team of excellent, well-trained professionals result in Mortoff's great position in the domestic market and abroad.

www.mortoff.hu
a.szonyi@mortoff.hu
+36 20 329 1280
H-1138 Budapest, Dunavirág utca 2., Gateway Office Park, I. torony, 3. emelet

PRODUCTS & SERVICES

Mortoff offers tailor-made solutions for your company. Starting with outsourcing in development, testing and BI functions, through several technologies - such as JAVA, .NET, C++ - frontend technologies, test automation, Big Data, Robotic Process Automation (RPA) and CRM solutions, ending with its in-house products for test management (Testify) and Industry 4.0 solution (REACH).

The services are designed to provide complete development teams, primarily with a SCRUM methodology, depending on project needs. The company's experienced colleagues are available from concept to implementation.

mortoff³
Understand. Go beyond. Deliver.

ADVANTAGES

Mortoff offers services from 3 locations with an extremely flexible approach. Its broad technology portfolio and industrial background in many areas (finance, manufacturing, retail, utilities) allow you to receive more than traditional development. Yet the company is also keen to understanding your needs, going beyond a simple solution and delivering in any circumstances. In the future, Mortoff will focus on expanding its services abroad, especially to Germany, Austria, The Netherlands, Sweden and the USA.

REFERENCES

Mortoff developed a cutting-edge Industry 4.0 solution for a Japanese Tier 1 automotive supplier. Data collection and real-time evaluation of data received from the machinery helped the factory improve its efficiency.

Implementation of a CRM system for a leading financial institution in Hungary led to much better customer service. The project started with a deep analysis of business needs. The development of the complete customer service system for the most significant job portal in Hungary made Mortoff proud, because the company helped to build the most competitive service for its customers in their field.

ARH INFORMATICS INC.

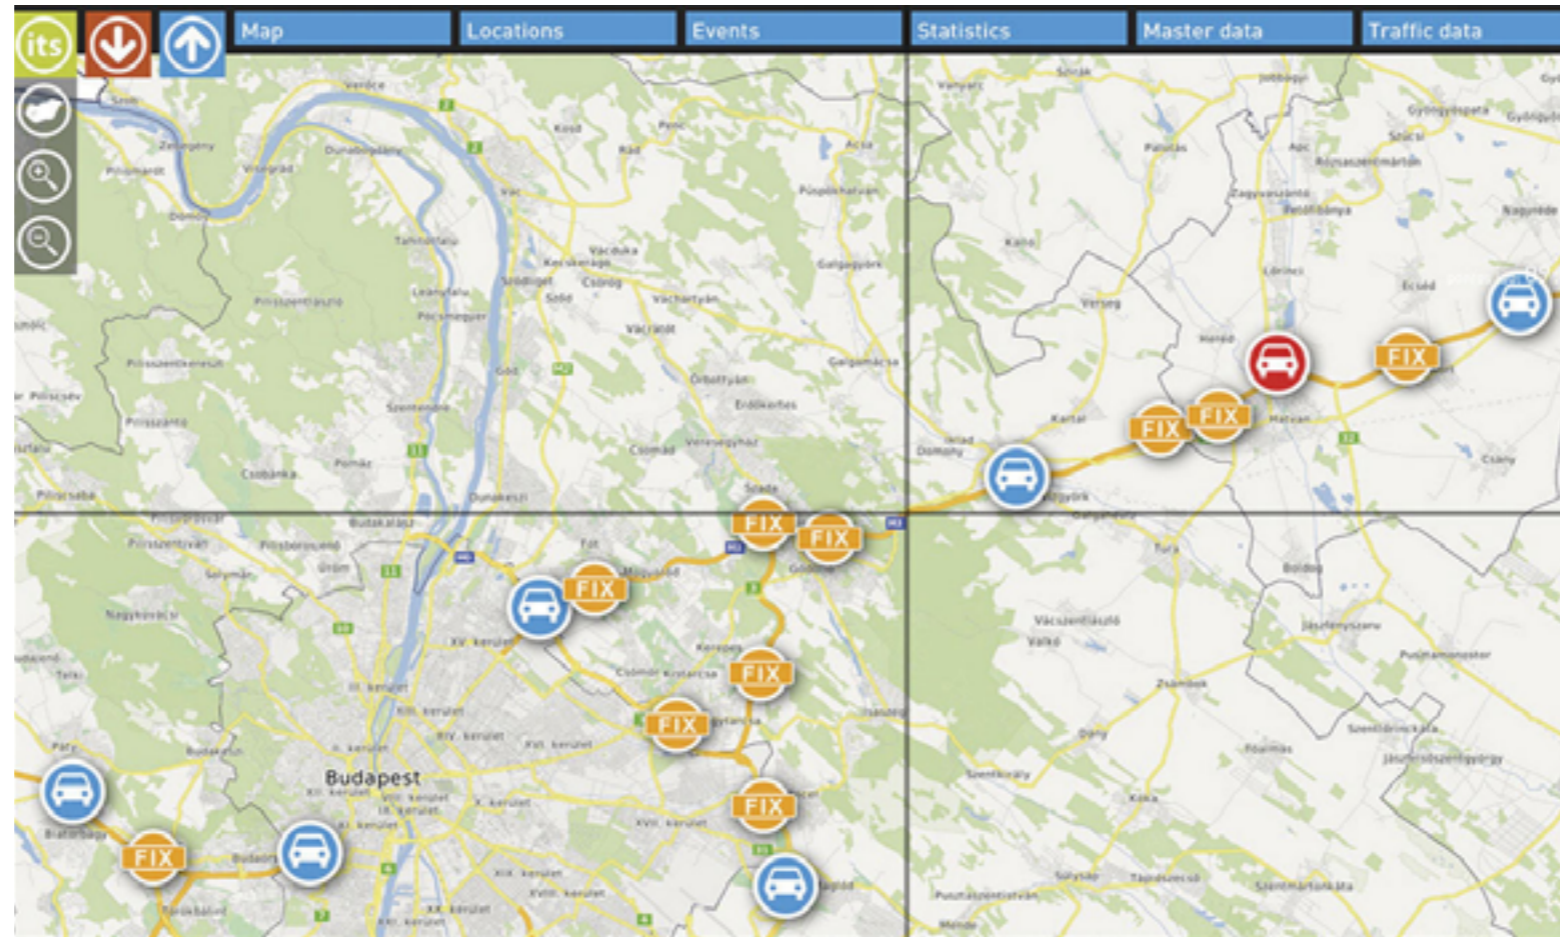

ARH stands for Adaptive Recognition Hungary Inc., which is a privately-owned, 29-year-old technology company with headquarters in Budapest, Hungary. The company develops and sells its own AI-based image recognition software and hardware solutions that transform road traffic, transportation and personal identification industries into data-driven, secure and efficient environments. ARH runs a global operation with subsidiaries in the USA, Denmark, Singapore and the Czech Republic, with 12,000+ satisfied partners and more than 160,000 systems installed worldwide.

www.arh.hu
 requestinfo@arh.hu
 +36 1 201 9650
 H-1123 Budapest, Alkotás utca 41.

PRODUCTS & SERVICES

All of its products and solutions are related to AI-based image recognition and optical character recognition ('OCR'), such as registration plate recognition software and cameras, ID document scanners for reading and verifying ID, intelligent transportation systems and smart CCTV security systems.

Application areas range from parking management, toll collection, road traffic enforcement systems (speeding, driving through red lights) to ID reading and verification at banks or borders, in KYC and AML systems, area protection and incident detection.

ADVANTAGES

As a customer-focused company, ARH is opting to build solid, long-term relationships with its clients. The company possesses remarkable manufacturing resources, including blueprint design, chip implanting, heat and shock testing and automated, robot-assisted assembly. ARH is ISO 9001, ISO 14001 and ISO 27001-certified.

Ghana / Angola / Rwanda / Ivory Coast / Egypt

BLACK CELL LTD.

Black Cell is a professional cybersecurity company with specialists with over 50 years of combined experience in each of its divisions: Security Operations Centre (SOC), Managed Security Services and Integration, Offensive Security Services and Compliance and Risk Assessment. Black Cell is a pioneer in a niche market, providing high-quality services to every client, regardless of the size of the business or the size of the individual deal. Black Cell acts fast; the company is dedicated to solving complex problems and works flexibly to meet the most rigorous expectations.

www.blackcell.io
info@blackcell.hu
+36 1 605 0302
H-1064 Budapest, Vörösmarty utca 67.

PRODUCTS & SERVICES

Black Cell SOC is a managed Cyber Security Operations Centre suitable for all kinds of organisations – e.g. SMBs, large enterprises, state actors and critical infrastructures – regardless of their size.

Offensive Security Services: ethical hacking, penetration testing, red teaming, open source intelligence-based information gathering, vulnerability assessment and social engineering.

Compliance and Risk Assessment: offers a wide variety of tailor-made consultancy services that helps organisations to comply with European Union and Member State cybersecurity and privacy legislation, international standards; to perform risk assessments; and to ensure appropriate procedures are in place to guarantee business continuity and disaster recovery.

ADVANTAGES

All of Black Cell's divisions specialise in protecting industrial control systems (ICS, SCADA). As safety and security are essential requirements, ICS and SCADA manage critical infrastructures.

SCADA systems feature human-machine interfaces (HMIs) and programmable logic controllers (PLCs) that monitor industrial operations and support systems such as the IT network, web servers and databases that work together in a typical environment. Black Cell is also a certified and vetted security solution provider partner for Microsoft's clients using cloud-based environments.

COMNICA LTD.

Comnica is a privately-owned Hungarian company delivering internet-based communication services and contact centre solutions. It has been operating in telecommunications for 17 years and provides its services in 40+ countries, connecting 100+ local and international networks. Comnica Contact offers cloud-based virtual contact centre and client management solutions for those who wish to improve their businesses, customer relations and customer experience. Comnica connects its clients to their customers by phone, email, SMS and video call. Its products are leveraged by customer service centres, enterprises and SMBs.

www.comnica.com
 sales@comnica.com
 +36 1 255 0990 / +36 20 441 1349
 H-1119 Budapest, Mohai út 38.

PRODUCTS & SERVICES

Comnica provides communication solutions from simple telecommunication services to comprehensive SmartSMS marketing, to complex multi-channel contact centre solutions. Comnica Contact Center is a virtual call and contact centre solution for companies, ranging from the smallest enterprises to the largest ones. A safe and straightforward cloud-based solution with easy access from anywhere in the world. Comnica CC allows you to connect to your customers via phone, email, SMS and video call, allowing you to blend your channels at any time or use them separately within your campaigns. The system's critical features are smart call management, easy to use transparent interface, real-time control, continuous quality assurance, sophisticated reports and simple visualisation. Comnica's SmartSMS platform offers the highest possible CTR rate for its client's surveys, loyalty programmes and promotions in numerous business areas.

ADVANTAGES

Comnica's advantages are easy-to-use-and-setup cloud-based modular solutions, with high customisability and features that allow very competitive, increased efficiency and measurability of all activities within the system. It provides high level support to its clients, guiding them towards the perfect solution for their endeavours, assisting them along the way. Security is essential; Comnica is both ISO and PCI DSS-certified and providing its services fully redundant.

REFERENCES

Comprehensive contact centre services for Wizz Air. It provides A-Z communication solutions for Wizz Air. 200+ users, 5 outsourced call centres in 5 countries.

Comnica serves TATA with its multilayer redundant infrastructure; the time spent going through Comnica's system increased considerably over the last 3 years.

Almost 300 customer service representatives use Comnica CC to connect potential and existing customers over the phone at Aegon.

POLYNET LTD.

PolyNet was established in 1994 by Hungarian telecom engineers, headquartered in Budapest, Hungary. PolyNet focuses on a particular segment of telecommunication solutions by developing, manufacturing and implementing network synchronisation systems, providing value-added services. As an equipment manufacturer, PolyNet produces frequency references and time sources such as IEEE1588 PTP Grandmasters, primary reference clocks, NTP servers and testing devices.

www.polynet.eu
info@polynet.eu
+36 1 250 7726
H-1037 Budapest, Montevideo utca 3/B

PRODUCTS & SERVICES

PolyNet's main products are the PTPGM 1010 Grandmaster Clock, the PTPGM 1009 Grandmaster Clock, the Ptest Wander Analyzer, the NTP Server and the E1 Splitter.

The company's service portfolio includes network analysis and optimisation surveys (Synchronisation Audit), synchronization network planning and consulting, network synchronisation training and workshop (in English, French and Hungarian), planning, installing and commissioning of hardware, ongoing user support (help desk, synch network support, spare parts management, annual on-site sync network check).

ADVANTAGES

Designing and building its equipment has given PolyNet in-depth technical knowledge and more than 25 years' experience. PolyNet is a fully independent private company, not linked with any vendor or operator. Its PTP Grandmaster Clock is a world-class product with the best client/user price. PolyNet always provides quick response times and personal services for its clients. Its specialist laboratory can test any telecoms equipment's synchronisation compliance and simulate 1,000s of PTP clients. The company has 130+ synchronisation systems installed across Africa and Europe.

QUADRON CYBERSECURITY LTD.

Quadron Cybersecurity Ltd. was founded in 2014 by Hungarian private individuals to provide highly qualified cybersecurity professionals for the international market. Quadron Ltd.'s mission is to keep up-to-date with the advancement of infocommunication technology to optimise its clients' cybersecurity readiness, awareness and responsiveness to maintain their profitability and enhance this through its innovative services. Quadron Cybersecurity Ltd. seeks to offer the broadest range of products on the developing cybersecurity market in Hungary.

www.quadron.hu
info@quadron.hu
+36 1 796 2122
H-1051 Budapest, Sas utca 10-12.

PRODUCTS & SERVICES

Quadron starts with any client by assessing the company's security strategy during a personal consultation. After this is complete, it offers state-of-the-art protection systems tailored to the company's specific needs. Information security supply is a core service from Quadron Ltd., which ranges from essential IT security product delivery to complex security system delivery. Although it is the primary business source, Quadron does not stop at the cybersecurity industry's edge. The company is also involved in self-driving car development, intelligent traffic management and R&D projects.

ADVANTAGES

The advantages of partnering with Quadron include continuous and simultaneous monitoring (5x8 or 7x24) of all IT security systems. It is effortless to outsource IT security, but very difficult and expensive to do in-house. Its service includes preventative alerts and immediate reports when an incident occurs. In addition to analysing events within the network, the anomalies revealed are compared to worldwide activities (real-time global intelligence - Global Intelligence Network). By outsourcing cybersecurity to Quadron, you avoid paying five full-time analysts.

REFERENCES

Quadron has worked with several companies that would certainly verify the company's high quality service, employees and incredible experts. Quadron has partnered with clients in critical national infrastructures (e.g. Hungarian air traffic control, National Water and Disaster Management Authority, Hungarian railways), ministries (e.g. Ministry of Finance in Kuwait), government finance (e.g. National Treasury and the Export-Import Bank), banks (e.g. Erste Bank, Budapest Bank, Raiffeisen Bank in Hungary), insurance (e.g. Signal in Hungary), telecommunication (e.g. Magyar Telekom, Telenor, Vodafone in Hungary, Qualitynet in Kuwait & TRA in Bahrain) and pharmaceuticals (e.g. Richter, Bayer in Hungary & Natmed in Kuwait).

PRODUCTS & SERVICES

Talk-A-Bot applies sophisticated open-source technologies – AI, NLP and machine-learning – to create intuitive business tools. Its clients' data is not shared with open-cloud services.

Its unique, multilingual bots natively support 100+ languages and are built from over 30 integrable function modules from its very own framework. Talk-A-Bot's content communication expertise helps its clients achieve at least an 85-95% response accuracy rate with their chatbots.

ADVANTAGES

All bots Talk-A-Bot has ever made are different because they are tailored to each client's cultural, geographical and business needs. Talk-A-Bot provides marketing and content management services and a customised bot personality – character, communication style, avatar. Choose from its ready-made use cases for lead generation, digital coupons, loyalty campaigns, micro-education, marketing automation, internal business communication or customer service.

REFERENCES

Erste Bank: Messenger, Viber and a portal chatbot that automates 97% of the contact centre's recurring questions.

Bosch: Internal communication solution that informs 16,000 workers who do not otherwise have other forms of digital channels.

Praktiker: shopping assistant chatbot that responds to 99% of typical user questions.

UNITED CALL CENTERS LTD.

United Call Centers provides quality services to its clients in customer service, customer relationship management, sales and related business activities. The company provides human and material resources of the highest standard.

United Call Centers adapts to its partners' ever-changing needs. Its goal is to grow its partners' efficiency and fully satisfy them with the services the company provides in the name of its partner companies. United Call Centers has over 200 virtual work-from-home agents and over 250 agents in its offices in Hungary.

www.unitedcallcenters.hu
info@unitedcallcenters.hu
 +36 46 757 775
 H-3525 Miskolc, Kis-Hunyad utca 9., 2. emelet

PRODUCTS & SERVICES

United Call Centers provides outstanding results in contact centre services, such as customer services, help desk & technical support. It offers native-speaking, work-from-home agents to support all languages and operates in a high-quality ISO27001-compliant environment.

Its flexible and scalable solutions are tailored to its partners' needs to increase their profitability and strengthen their brand recognition. United Call Centers utilises the latest technologies, such as robotic process automation and chatbot technology, to maximise the customer experience.

ADVANTAGES

United Call Centers' partners can significantly increase customer satisfaction, brand recognition and profitability with its services. The unique business model created through a digital technology and human solutions synergy allows the company to develop flexible solutions, accommodating seasonal peaks and volume trends in inbound and outbound call centre services.

Home-working agents are able to support any language at native level, with perfect local cultural knowledge and no language barriers. This ensures a high level of customer experience.

REFERENCES

United Call Centers supports Top 500 companies in customer service for next-generation FMCG products, technical service device support and healthcare customer service support in EMEA & APAC.

PROWORX DIGITAL LTD.

Proworx Digital, as part of Createam Advertising Agency, was founded at the end of 2018 to establish a new vision for sales and marketing automation primarily focusing on lead generation, marketing automation and a business boost. All of its marketing platforms are closely related to the sales cycle and customer journey. Proworx Digital offers ready-made and licensable SaaS marketing application toolkits with seamless software customisation, setup and implementation. The yearly contracted monthly fees are all-inclusive (license + hosting + support included). Its team is also ready to provide project-related marketing automation consultancy work: market and gap analysis, competitor check, sales support marketing strategy and the e-commerce/digitalisation action plan are the best sellers in Proworx Digital's repertoire.

www.proworx.hu / www.starpag.hu / www.shopprime.hu
 hello@proworx.hu
 +36 30 436 2640
 H-1026 Budapest, Harangvirág utca 5.

ADVANTAGES

Proworx Digital's motto is 'we were all born to be efficient'. All of its solutions are measurable, scalable and sustainable digital SaaS. All primary sector KPIs can be incorporated to meet ROI criteria, and due to the cloud-based architecture, all platforms can follow your daily business needs. Every tool's fee structure reflects platform performance & customer savings, providing a positive ROI within 12 months.

REFERENCES

Starpag was successfully used by several customers last year: Procter & Gamble, MKB Bank, Aldi, Euro Family, Ferrero and MÁV. Shopprime is used by MOL in Hungary and making its way into the retail market. Quarterback is a fully functioning tool for local financial institutions. Quarterback is used by MKB Bank and Budapest Institute of Banking.

Overall project value: EUR 250,000

PRIMARY TARGET MARKETS

Germany / France / Austria / Poland / Czech Republic

PRODUCTS & SERVICES

Starpag: The platform is ideal for multinational corporations managing different brand groups regionally/internationally. Non-coder and low-marketing-educated 'office users' can create a marketing microsite in 4 different subcategories: promo, quiz, survey, image. The campaigns are self-managed and fully automated. Customer interaction and reporting are included.

Shopprime: The first global booking, management & signage platform for POS marketing messages. POS/ePOS marketing tools and surfaces can be booked, remotely managed and sent to print houses or the built-in signage platform via this SaaS platform. Aside from

transparent digital management and workgroup support (messaging functionality), it is also increasing retail & service revenue through the third-party monetisation of POS surfaces. The registered external partners can book their campaigns using the unsold stores' inventory. As a collateral benefit, the 360-degree POS campaigns are also upgrading the shopping experience during the customer journey.

Proworx Digital provides a full-scale digital campaign management wizard to help your sales, marketing & PR department and outsourced marketing agencies plan entire multi-channel campaigns involving print DM, e-DM, personalised web layer and mobile app push notifications as separate campaign items reorganised in one holistic communication approach.

CELLUM GLOBAL CORP.

Cellum Global is a leading secure mobile payment and commerce company based in Hungary. Its innovations make transactions via smartphones more comfortable, more secure, and the bank-grade security solutions cover all areas of m-commerce, including mobile purchases and payment as well as NFC (contactless) technologies. Established in 2000, the company began its international expansion in 2011, opening representative offices in several European markets and Asia, including Jakarta, Indonesia. Metranet, a subsidiary of Indonesia's number 1 ICT corporate group Telkom Indonesia, entered into a strategic collaboration with Cellum and acquired minority ownership in it.

www.cellum.com
 krisztian.racz@cellum.com
 +36 20 320 6648
 H-1126 Budapest, Derkovits utca 3.

PRODUCTS & SERVICES

Cellum provides comprehensive mobile payment solutions to a broad range of customer groups, including banks, mobile network operators, merchants and governments. Its flagship product, Cellum Mobile Next, is an end-to-end remote payment system capable of conducting transactions from any type of payment instrument on any kind of handset, covering a large and growing universe of use cases.

Cellum's solutions are available for white-label use worldwide and offer speedy implementation and seamless integration with existing applications.

Erste MobilePay

Telenor Wallet

Finnet

CTC

ADVANTAGES

The key advantages of Cellum's solutions are patented and patent-pending/unique technology – state-of-the-art secure card data storage and tokenisation. The open access enables transactions on any mobile device, primary operating system, running on any mobile network, using any type of funding source held with any financial service provider (commonly referred to as 'third party agnostic').

The security of the company's solutions has a 0% fraud rate and no data heist. Simple, easy-to-understand user experience for everyone. The system works together with other ecosystems and is PCI-DSS-certified, PSD2-compliant; on the other hand, it is BI and GDPR compliant.

REFERENCES

The systems used during operation manage over two million secure transactions per month and work with partners such as MasterCard, Magyar Telekom, Telenor, Erste Bank, OTP Bank, Telkom Indonesia, Finnet and MAP - GPay in Indonesia, Itochu Technology Corp. in Japan.

PRIMARY TARGET MARKETS

Indonesia and other countries in the APAC region / Japan / EU

MAKE(S)ENSE LTD.

Make(s)ense Ltd. has been developing reliable, high-quality geomagnetic parking occupancy sensors for on-street parking since 2016. Its operation and development are located in Budapest, Hungary. The product portfolio consists of both flush mount and on-ground sensor nodes.

Real-time parking information enables smart cities to launch several useful services, resulting in less traffic, less air pollution, better tracking and understanding of parking habits and car park utilisation by inhabitants.

www.makesense-tech.com
 sales@makesense-tech.com
 +36 30 883 2332
 H-1071 Budapest, Peterdy utca 15.

PRODUCTS & SERVICES

Make(s)ense sensors are designed for zero maintenance and a long (>5 years) operating life. Devices communicate on NB-IoT networks, hence no need for additional installed hardware elements. This streamlined architecture results in minimised maintenance needs and cost-effectiveness.

Real-time parking information collected and stored in the Make(s)ense cloud application, provided to applications via the interface. Last-mile navigation and optimised intermodal route planning are feasible based on real-time data.

ADVANTAGES

Make(s)ense sensor nodes provide high detection accuracy (>96%) combined with excellent electronic disturbance and noise filtering.

That is why Make(s)ense sensors can be in service near places where high voltage applications were significantly influencing the geomagnetic field (e.g. tram tracks, transformers, high voltage ground cables). Using Make(s)ense Cloud, the company offers its partners the opportunity to provide their localised applications and platforms to end users and municipalities.

ASURA TECHNOLOGIES LTD.

Asura Technologies is the developer of easy-to-integrate, camera-vendor-independent number plate recognition (NPR) and video analytics software, implementing AI for parking and traffic management security/safety systems. Asura Technologies debuted the Asura Recognition Unit (ARU) number plate recognition software in 2017, delivering an easy-to-integrate, flexible solution to traffic and parking system integrators. ARU earned a Special Mention at the 2018 Intertraffic Innovation Awards.

www.asuratechnologies.com
 request@asuratechnologies.com
 +36 70 202 3333
 H-1114 Budapest, Bartók Béla út 76.

PRODUCTS & SERVICES

Asura Recognition Unit (ARU) – Plug and play number plate recognition application available for fixed and mobile installations.

MMR – Video analytics software with make, model, colour recognition and categorisation for the vehicle.

ACE – Access control extension module for ARU; a lightweight application to automate vehicle access based on the number plate and vehicle information on sites where a barrier controls entry and exit.

Digital chalking – Number plate recognition-based on-street parking enforcement solution, an extension to the mobile number plate recognition application.

Traffic video analytics provide real-time analysis of the traffic, checking the direction of the vehicle, wrong turns, running the red light and proceeding in the wrong lane.

Parking space occupancy detection – Video analytics-based solution monitoring parking spaces and providing real-time occupancy information.

Parking monitor – Video analytics-based frictionless parking enforcement model providing 24/7 automated enforcement for barrierless parking sites.

ADVANTAGES

Setup is quick and cost-effective: Asura supplies its software and applications, so integration is possible without allocating significant resources to the task, saving both time and money.

Compatibility: The software is compatible with any camera and connects to any back-end system without issues.

Automatic notifications: The software notifies operators whenever human interaction is needed, thus making the monitoring activity more effective.

Scalability: Asura solutions are fully scalable; the company is able to monitor a single site to an entire city.

HUNGAROCONTROL PTE. LTD. CO.

HungaroControl is a certified provider of air navigation and specialist professional services. With its dedicated workforce, HungaroControl delivers safe, efficient and environmentally sustainable air navigation services to more than one million flights in Hungary and - on NATO assignment - in Kosovo's upper airspace. Leveraging both the breadth and depth of their experience, HungaroControl partners work with global service providers to solve their burning problems and help them achieve their strategic goals, providing customers with more than just step-change improvements. Thus, clear pathways to translate air traffic management innovation into valued service outcomes.

www.hungarocontrol.com
 solutions@hungarocontrol.com
 +36 1 293 4444
 H-1183 Budapest, Igló utca 33-35.

PRODUCTS & SERVICES

HungaroControl launched SkyHub, the brand behind all of its complex products and services providing tailored industry solutions. The company is experimenting with the latest technologies and already harnessing AI's power to leverage its benefits within simulation and operational environments.

As the world's first to deploy a fully capable remote tower for a medium-sized airport in 2015, HungaroControl has extensive experience in the domain. Its remote tower services provide a cost-effective digital alternative to conventional tower operations, enabling a refocus on delivering valued services to customers.

REFERENCES

Dubai Air Navigation Services - digital tower

As part of a delivery consortium, HungaroControl applied its digitalising tower operation experience to support the concept development and business case for digital tower implementation at Dubai International Airport and Dubai World Central.

Functional Airspace Block Central Europe (FAB CE) - free route airspace validation

The simulation aimed at validating the developed Concept of Operations. HungaroControl carried out validation exercises on both Fast Time Simulation (FTS) and Real-Time Simulation (RTS) platforms. The simulation investigated what changes the FAB CE free route airspace (FRA) would imply on the current fixed-route network and FRA's effect within individual FAB CE Member State borders.

ISAVIA (Iceland) - air traffic controller training

HungaroControl organised multi-session refresher training for air traffic controllers (speed control, vectoring services) and a pseudo-pilot workshop in our Simulation Hub.

PRIMARY TARGET MARKETS

China / India / Malaysia / Indonesia / Thailand

ADVANTAGES

Highly-developed experience in consulting and advising in the air traffic management (ATM) domain

HungaroControl supports air navigation service providers with a strong capability base, covering aeronautical information management and information management. Additionally, it also has a deep understanding and proven experience in implementing tailored ATM capabilities, from concept to operation. HungaroControl's professionals have several decades of experience as users, operators, delivery specialists and advisors.

Advanced simulation and validation capabilities

Simulation HUB is Europe's largest commercial radar simulator for validation activities. HungaroControl offers end-to-end simulation solutions in a state-of-the-art technical environment and compliance with the highest innovation standards.

NNG LTD.

NNG believes in a connected future where personal digital ecosystems blend seamlessly with automotive technology to provide exceptional user experiences. Its capabilities include flexibility and incredible expertise, insight and innovation, allowing NNG to deliver solutions that help to connect people and communities and make transportation smarter, safer and more fulfilling for everyone. It offers seamless, modular and integrated location-based solutions supported by cloud services and revolutionary UX design software enabling fully integrated intelligent interiors. The company delivers essential in-vehicle cyber-security management and network optimisation solutions.

www.nng.com
orsolya.ludvig@nng.com
+36 1 872 0000
H-1037 Budapest, Szépvölgyi út 35-37.

PRODUCTS & SERVICES

Navigation: NNG's expertise in automotive navigation allows the company to offer optimised location-based solutions for vehicles from entry- to premium-level.

In-Vehicle User Experience: NNG's user experience teams support its partners in developing next-generation integrated environments.

Telematics Business Operation Support System: TBOSS enables you to analyse fleet data on the fly and manage marketplace features over-the-air.

In-Vehicle Cyber Security: NNG's award-winning cyber-security management systems and network optimisation solutions provide and can also extend the lifespan of existing in-vehicle networks.

ADVANTAGES

NNG can create fully customised, integrated solutions, or NNG's expertise can be brought in-house with dedicated tools and strategic development teams.

The company works closely with market leaders throughout the automotive ecosystem.

ANIMALSOFT LTD.

AnimalSoft is a Budapest-based software company that develops a platform for livestock producers to capture the potential in Precision Livestock Farming. The company helps farmers to survive and thrives under challenging market circumstances.

In the most essential respects, AnimalSoft unites farmers who work closely with other livestock producers to direct its product development process in the right direction. AnimalSoft's aim is to provide a powerful tool to its users to stay competitive while upgrading their production performance and profitability.

www.livestocker.hu
info@animalsoft.hu
 +36 30 931 0170
 H-1013 Budapest, Pauler utca 6.

PRODUCTS & SERVICES

Livestocker is a business intelligence platform where production data are collected manually - through the APP or direct input into the software - and automatically from the cloud, servers, import files in a structured way. It allows users to process data into information and find answers to their production issues by exploring correlations between certain parameters.

Within Livestocker, there is a medication module with the capacity to monitor antibiotic use and to report it to the authorities when necessary.

ADVANTAGES

By using Livestocker, the farm is not only able to collect data, from ordering to production to its final product sales, but it informs management immediately with no additional work. Data collected and stored in this structured way makes it possible to analyse any key performance indicators - ADG, FCR, mortality - their trends and all the financial aspects of these parameters such as cost and/or value of growth. Livestocker provides an opportunity to follow production trends and find bottlenecks without advisors entering the stable too often; biosecurity benefits are therefore also included via this system.

INDIVIZO LTD.

Indivizo offers an AI-powered hiring platform with recruitment automation to help HR professionals hire top talent faster, based on quality candidate information. Its innovative, cloud-based pre-screening tools - such as automated video interviews, automated tests, gamified assessment and AI-based personality profiling - focus on data to evaluate candidates' performance and measure the recruitment process' efficiency, freeing up significant recruiter time to focus on what is important - people. Indivizo strives to be the regional leader in cloud-based recruitment by providing the right platform and data-based information to HR professionals to make better hiring decisions, retain the best talent and for HR to become a more strategic profession.

www.indivizo.com
hello@indivizo.com
 +36 1 788 1226
 H-1123 Budapest, Alkotás utca 17-19.

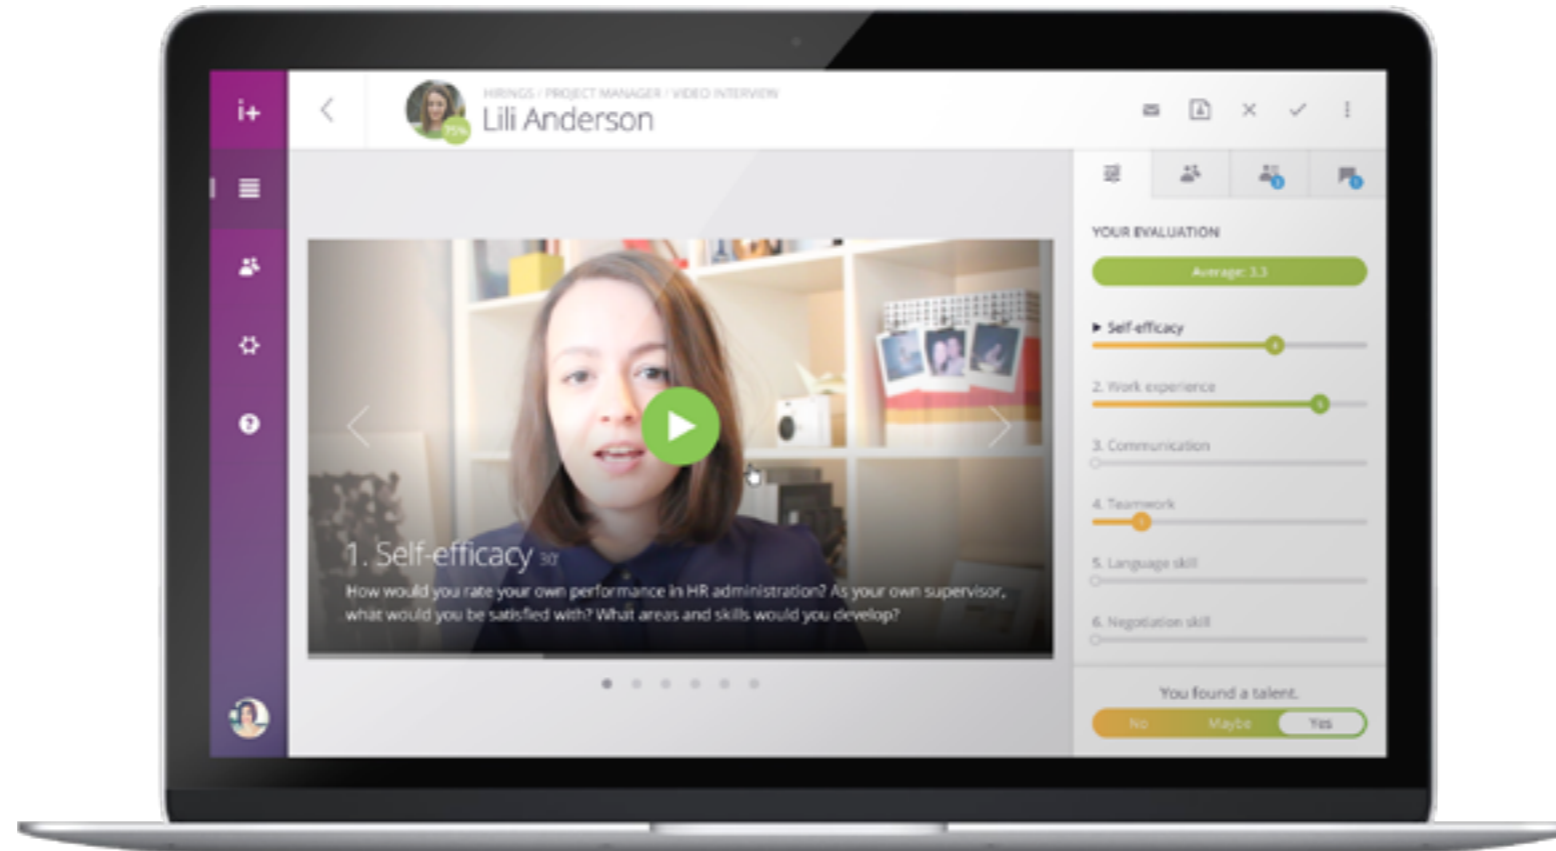

PRODUCTS & SERVICES

AI-powered automated video interviews

Recruiters prepare their questions first, even enhance them with pictures and videos, then the software runs the video interviews without their participation. It's a real interview situation, where applicants have to answer as soon as a question appears. The hiring team can watch and evaluate the recorded videos anytime and anywhere. Personality insights are based on the psychology of language in combination with data analytics algorithms. This service analyses the content of the automated video interviews and returns an online personality profile.

Gamified assessment

Big data and behavioural skill assessment reveal candidates' underlying competencies and skills. This innovative tool makes it possible to have real-time,

powerful and data-based insight into critical skills, such as logical thinking, planning, problem-solving and more to ensure the right people get hired for the right roles.

Automated tests

Automated tests can be used to screen applicants' knowledge before spending valuable time and money on interviewing them. Recruiters can select from Indivizo's test offering or put together their own questions. The system arranges the process - from invitation to execution, to automatic evaluation and even updating candidates on their results.

Cloud-based ATS platform with flexible workflow management

indivizo+

ADVANTAGES

Any company's success depends on its talent, and HR professionals struggle to identify which applicants are guaranteed to perform well in a position. Indivizo's innovative, AI-powered recruitment tools measure candidates' skills and competencies and provide data-based, objective results that help make better hiring decisions.

With these tools, the user receives a +300% increase in efficiency, -79% time spent on pre-screening, a five-times better quality talent pool, data-driven hiring decisions and semi- or fully-automated pre-screening.

JobCTRL Ltd. helps companies to be more productive, organisations to be more open and creates a fairer and more effective, flexible working environment for all.

ADVANTAGES

JobCTRL Ltd. is a very flexible, client-focused smart company, developing the unique JC360 tool with the broadest spectrum for operational efficiency improvement, work automation and worker motivation. JC360 is a must-have solution for any flexible working environment and organisations with a focus on cost-efficiency. The company ensures maximum utilisation of labour resources and helps to develop the conditions for productive mobile work. JC360 is the best available tool on the market for creating corporate transparency and generating a real-time cross-functional view of business operations.

LOGIN AUTONOM LTD.

Login Autonom Ltd. has been present in business since 1990. Initially, the company offered solutions for system integration and it has been expanding its service list ever since based on customer demands. In the past 30 years, many issues have been identified and solved at system level with the help of its software. Login Autonom Ltd. believes that most problems can be handled if the human factor is excluded and well-implemented technology is relied upon. The company is also convinced that technology promotes the creation of more humane and more intelligent systems. Login Autonom Ltd. hopes to assist domestic and international partners in achieving a considerable improvement in production and employee retention by continually enhancing the companies' product solutions and customer service.

PRODUCTS & SERVICES

EASE++ employee software: increasing efficiency through employees.

EASE++ is an interconnected software system developed and further improved to answer the challenges faced in HR, production and organisational development.

Login Autonom Ltd.'s solutions contribute to well-structured effective operation at system level, triggering positive changes in finances and staff attitudes shortly after implementation. The EASE++ software modules are Workhour, Holiday, Competency, Access, Guest, Cplatform, Productivity, Shift, Workwear and AI.

ADVANTAGES

Long-standing market players typically have other core businesses (eg. payroll, security access), while start-ups do not target this market; the target group can thus be identified as 'underserved'. Thanks to Login Autonom's security and engineering history, it has a significant competitive edge because competitors predominantly possess HR or IT skills. As a result of the interdisciplinary approach and wide-ranging scientific cooperation (Hungarian Academy of Sciences, Óbuda University, Széchenyi University, My-X Artificial Intelligence Research Group, etc.), the company dictates developments in HR and shop floor human IT solutions. In industrial HR software, Login Autonom Ltd. offers unique, complete business solutions.

PRODUCTS & SERVICES

NEXON's main profile is the development and support of complex human resource applications.

The company's portfolio:

NEXONpayroll

Hungary's leading comprehensive payroll solution.

NEXONHR

Fully-fledged HR personnel administration and reliable HR recordkeeping.

NEXONtime

Worktime planning, scheduling and recording, fully integrated with payroll.

NEXON_PORT

Self-service employee administration, improving HR efficiency with its software and a mobile app developed to access the self-service HR system. NEXON_PORT+ is available on iOS and Android platforms.

NEXONcafe

Comprehensive solution for the selection and administration of employee cafeteria benefits.

Another item within NEXON's business portfolio is payroll outsourcing. In Hungary, payments for 70,000 employees are executed through the NEXONsource solution.

Under the SaaS arrangement, NEXON hosts your applications and data on its servers, which can then be accessed online using your web browser.

NEXON

ADVANTAGES

In addition to continuous software development, NEXON offers ongoing product support, customer care, a helpdesk, complete comprehensive payroll and HR outsourcing service.

With its 30 years of experience, NEXON is an expert in payroll and HR administration.

NEXON has 5 regional offices (at Győr, Nyíregyháza, Kecskemét, Veszprém, Budapest), headquartered in Budapest.
